GameWorld

91.462 GUI Programming II
UMass Lowell

Project Milestone #1: Proposal

Bunlong Heng | Sereyrath Nov | Andi R. Milhomme

Table of Contents

Goal

GameWorld is the web application that provides description on how to get the game set up and running either on your Mac or Windows along with tips and tricks on the most popular game consoles in the world.

clear, concise, realistic

Feature Descriptions

GameWorld features the most popular gaming platforms that includes consoles such as PlayStation, Xbox, Sega, NES, and handled devices such as iPod Touch, Android tablets and Windows mobile devices. The users will be able to select their platform of interests. This site will provide the description of each gaming system, including facts, history of the systems along with the technical specifications, best place to get the game for good deals and their most popular titles of the game. GameWorld also offers cheat codes feature where it's applicable. The users will also be able to comment about their interested titles and platforms.

In addition we would like to provide alive updated on the most popular games. We will inform the users on tips and tricks regarding on their favorite games. We will also provide instruction on how to set up old arcades games on their operating systems only if it's possible. At the same time, if they get stuck we will provide help to them only if they are registered users.

The benefits of being registered users are

- Technical issue support will be provide
- Add Favorite console to Favorite List
- Create Profile with their information
- Put profile picture
- Can comment on games
- Get notification when a new games is arriving or new cheats has been added.
- Users will get an alert only the one that they added to their favorite

Search Engine

Users will be able to search for games by typing keywords such as game names or tips or tricks on their favorite games in the search bar.

The search engine will provide a list of possible results while the users typing in the keywords.

Favorite Game List

For each registered user, they can add their favorite consoles to their favorite list. Based on their favorite list, we will suggest them the new top 10 popular of their specific console.

User Account Registration

The users will have the options to weather or not to register on our site.

practical, doable
comply with GUI standards
clearly described
